

Minimum requirements

LibreOffice 4.0 requires one of the following operating systems:

- **Microsoft Windows** XP, Vista, Windows 7, or Windows 8
- **GNU/Linux** Kernel version 2.6.18, glibc2 v2.5 or higher, and gtk v2.10.4 or higher
- **Mac OS X** 10.4 (Tiger) or higher

Administrator rights are needed for the installation process.

Some LibreOffice features (wizards and the HSQLDB database engine) require that the Java Runtime Environment (JRE) is installed on your computer. Although LibreOffice will work without Java support, some features will not be available.

For a more detailed listing of requirements, see the LibreOffice website.

<http://www.libreoffice.org/download/system-requirements/>.

How to get the software

The software can be downloaded from <http://www.libreoffice.org/>. You can also download the software by using a Peer-to-Peer client, such as BitTorrent, at the same address.

Linux users will find LibreOffice included in many of the latest Linux distributions; Ubuntu is just one example.

How to install the software

Information on installing and setting up LibreOffice on the various supported operating systems is given here: <http://www.libreoffice.org/get-help/installation/>.

Extensions and add-ons

Extensions and add-ons are available to enhance LibreOffice. Several extensions are installed with the program and others are available from the official extensions repository.

<http://extensions.libreoffice.org/>. See *Chapter 14 Customizing LibreOffice* for more information on installing extensions and add-ons.

Starting LibreOffice

The most common way to launch any component of LibreOffice is by using the system menu, the standard menu from which most applications are started. On Windows, it is called the Start menu. On GNOME, it is called the Applications menu. On KDE it is identified by the KDE logo. On Mac OS X, it is the Applications menu.

When LibreOffice was installed on your computer, a menu entry for LibreOffice and each LibreOffice component was added to your system menu if your computer uses a Windows or Linux operating system. On computers operating Mac OS X, only a menu entry for LibreOffice is added to the Applications menu.

Clicking on the LibreOffice menu entry opens the LibreOffice Start Center (Figure 2) from where you can select the individual components of LibreOffice. You can also select to open an existing file or use a template.

Manual En Ingles

SJ Ball

Manual En Ingles:

Yeah, reviewing a books **Manual En Ingles** could ensue your close friends listings. This is just one of the solutions for you to be successful. As understood, execution does not recommend that you have astonishing points.
