

### Chapter 3

## Performance Task (continued)

### Squaring a Treehouse

When builders construct any structure, they make sure it is plumb, level, and square. What do these terms mean? How are they related to concepts of geometry? What relationships between them can you support?

- When building a tree house, it is important to make sure the sides are truly vertical, or *plumb*. The sides and floors must meet at right angles, so that the corners are *square*. The floors must be horizontal, or *level*. Make a statement explaining how each of the carpentry terms plumb, square, and level are connected to geometry, and a statement explaining how they relate to each other.

- Using the picture of the treehouse at the right, find the measure of the specified angle and state its relationship to  $\angle 4$ . Lines  $r$  and  $s$  are parallel with a transversal  $t$ , and  $m\angle 4 = 112^\circ$ .
