To ensure accuracy, it is best to make a template when cutting the opening in the counter.

3 The following MINIMUM clearance dimensions must be maintained.

If a 30" clearance between the cooking surface and overhead combustible materials or metal cabinets cannot be maintained, a minimum clearance of 24" is required and the underside of the cabinets above the cooktop must be protected with not less than 1/4" insulating millboard covered with sheet metal not less than 30 gage (0.0125") thick. A ventilation hood may be installed above the cooktop. See the ventilation hood installation instructions for the appropriate dimensions and clearances.

4 Make sure the wall coverings, countertop and cabinets around the cooktop can withstand heat (up to 200°F) generated by the cooktop.
