Assistive Technology for People with Disabilities Denis K. Anson, 2018-08-09 How would you make a phone call or send email if you couldn't hear see or use your hands This book shows how assistive technology helps individuals with disabilities perform tasks that people without disabilities may take for granted Assistive technology can be used in two ways to help people with disabilities to do things that people without disabilities can do without technology and to improve access to everyday technology that is not designed for people with disabilities In both cases the focus is on matching individuals with the tools best suited to fill their needs A part of Greenwood's Health and Medical Issues Today series *Assistive Technology for People with Disabilities* explores what technologies are available to individuals with disabilities what they can help them to accomplish and potential hurdles to their use that must be overcome It explores this exciting field broadly and in depth while still keeping the people first mindset that is the hallmark of assistive technology In addition it provides guidance and resources for individuals seeking assistive technology for themselves or for a loved one [GE Transistor Manual](#) General Electric Company. Semiconductor Products Department, 1964 [User-Innovation](#) Viktor Braun, Cornelius Herstatt, 2009-06-06 Economic growth is highly dependent on technological progress and innovation yet the sources from which these innovations originate are still largely misunderstood and untapped Recent research has demonstrated that users rather than manufacturers are often a critical source of innovation in numerous fields from extreme sports to medical devices to software This book systematically identifies the most important barriers to user innovation and critically evaluates the democratization of innovation argument by critically assessing the main legal economic technological and societal barriers to user innovation for the first time and proposing alternative possibilities Through original research the author reveals the dynamics of user innovation and offers strategies for minimizing those factors that inhibit and stifle the spread of this phenomenon From this analysis it becomes clear that user innovation has become more difficult over time and that the problem is now of how manufacturers can enable users to overcome the discussed barriers and simultaneously benefit from such consumer driven activities Arguing that licenses are not just an important technology commercialization instrument but are tools critical to generating innovations the author explains how licenses can in certain situations be employed to help users overcome some of the barriers to user innovation *User Innovation Barriers to Democratization and IP Licensing* is a practical guidebook as well as a startlingly original work of scholarship that will be essential reading for years to come
