Typeset in the Future Dave Addey, 2018-12-11 A designer's deep dive into seven science fiction films filled with gloriously esoteric nerdery and observations as witty as they are keen. Wired In Typeset in the Future blogger and designer Dave Addey invites sci-fi movie fans on a journey through seven genre-defining classics, discovering how they create compelling visions of the future through typography and design. The book delves deep into 2001 A Space Odyssey, Star Trek: The Motion Picture, Alien, Blade Runner, Total Recall, WALL-E, and Moon, studying the design tricks and inspirations that make each film transcend mere celluloid and become a believable reality. These studies are illustrated by film stills, concept art, type specimens, and ephemera, plus original interviews with Mike Okuda (Star Trek), Paul Verhoeven (Total Recall), and Ralph Eggleston and Craig Foster (Pixar). *Typeset in the Future* is an obsessively geeky study of how classic sci-fi movies draw us in to their imagined worlds.

Screening Big Data Gerald Sim, 2024-07-30 This book examines the influence of key films on public understanding of big data and the algorithmic systems that structure our digitally mediated lives. From star-powered blockbusters to civic-minded documentaries positioned to facilitate weighty debates about artificial intelligence, these texts frame our discourse and mediate our relationship to technology. Above all, they impact society's abilities to regulate AI and navigate big tech's political and economic maneuvers to achieve market dominance and regulatory capture. Foregrounding data politics with close readings of key films like *Moneyball*, *Minority Report*, *The Social Dilemma*, and *Coded Bias*, Gerald Sim reveals compelling ways in which films and tech industry adjacent media define apprehension of AI. With the mid-2010s techlash in danger of fizzling out, *Screening Big Data* explores the relationship between this resistance and cultural infrastructure while highlighting the urgent need to refocus attention onto how technocentric media occupy the public imagination. This book will interest students and scholars of film and media studies, digital culture, critical data studies, and technopolitics.

Beyond Media Borders, Volume 1 Lars Elleström, 2020-10-14 This open access book promotes the idea that all media types are multimodal and that comparing media types through an intermedial lens necessarily involves analysing these multimodal traits. The collection includes a series of interconnected articles that illustrate and clarify how the concepts developed in Elleström's influential article *The Modalities of Media: A Model for Understanding Intermedial Relations* (Palgrave Macmillan, 2010) can be used for methodical investigation and interpretation of media traits and media interrelations. The authors work with a wide range of old and new media types that are traditionally investigated through limited media-specific concepts. The publication is a significant contribution to interdisciplinary research, advancing the frontiers of conceptual as well as practical understanding of media interrelations. This is the first of two volumes. It contains Elleström's revised article and six other contributions focusing especially on media integration, how media products and media types are combined and merged in various ways.
