Guide To Perfect Pecs:

Fundamentals of Electromagnetics David Voltmer, 2022-05-31 This book is the first of two volumes which have been created to provide an understanding of the basic principles and applications of electromagnetic fields for electrical engineering students *Fundamentals of Electromagnetics Vol 1 Internal Behavior of Lumped Elements* focuses upon the DC and low frequency behavior of electromagnetic fields within lumped elements The properties of electromagnetic fields provide the basis for predicting the terminal characteristics of resistors capacitors and inductors The properties of magnetic circuits are included as well For slightly higher frequencies for which the lumped elements are a significant fraction of a wavelength in size the second volume of this set *Fundamentals of Electromagnetics Vol 2 Quasistatics and Waves* examines how the low frequency models of lumped elements are modified to include parasitic elements Upon completion of understanding the two volumes of this book students will have gained the necessary knowledge to progress to advanced studies of electromagnetics

Marine Pilotage Great Britain: Parliament: House of Commons: Transport Committee, 2013-03-07 This report questions whether the Department for Transport is striking the appropriate balance between its role as a regulator of port safety and its aim to promote the commercial attractiveness of UK ports This follows evidence that most ports fail to confirm to Government that they comply with best practice guidance on port safety and the Maritime and Coastguard Agency has the resources to conduct just four port health checks each year Representatives of marine pilots who guide ships in and out of ports lack confidence that the Department for Transport understands their concerns and the requirements of their work and shares their aim of enhancing maritime safety The Committee is opposed to a proposal supported by Government to relax the rules on the granting of pilotage exemption certificates to more junior navigating officers which could jeopardise safety If the Government insists on pressing ahead with this change the Committee recommends that the impact of the change should be monitored Other recommendations include that the Maritime and Coastguard Agency should broaden its safety inspection programme so that it undertakes eight inspections per annum ports should be required to publish statistics on accidents and near misses the Government should use its influence to persuade harbour authorities to accept national standards as to who can be authorised as a pilot if national standards are not adopted the case for legislation on this issue will be compelling
