
Financial Reporting and Analysis
Chapter 1 Solutions
The Economic and Institutional Setting for Financial Reporting Problems

Problems

P1-1. Demand for accounting information

Requirement 1:

a) *Existing shareholders* use financial accounting information as part of their ongoing investment decisions—should more shares of common or preferred stock be purchased, should some shares be sold, or should current holdings be maintained? Financial statements help investors assess the expected risk and return from owning a company's common and preferred stock. They are especially useful for investors who adopt a "fundamental analysis" approach.

Shareholders also use financial accounting information to decide how to vote on corporate matters like who should be elected to the board of directors, whether a particular management compensation plan should be approved, and if the company should merge with or acquire another company. Acting on behalf of shareholders, the Board of Directors hires and fires the company's top executives. Financial statement information helps shareholders and the board assess the performance of company executives. Dismissals of top executives often occur following a period of deteriorating financial performance.

b) Financial statement information helps *potential (prospective) investors* identify stocks consistent with their preferences for risk, return, dividend yield, and liquidity. Here too, financial statements are especially useful for those investors that adopt a "fundamental approach."

c) *Financial analysts* demand accounting information because it is essential for their jobs. Buy-side and sell-side analysts provide a wide range of services ranging from producing summary reports and recommendations about companies and their securities to actively managing portfolios for investors that prefer to delegate buying and selling decisions to professionals. Analysts rely on information about the economy, individual industries, and particular companies when providing their services. As a group, analysts constitute probably the largest single source of demand for financial accounting information—without it, their jobs would be difficult, if not impossible, to do effectively.

d) *Managers* demand financial accounting information to help them carry out their responsibilities and because their compensation often depends on financial statement numbers like earnings per share, return on equity, return on capital employed, sales growth, and so on. Managers often use a competitor's

Solutions Simple Formats Tables Notes and Hints Step by Step approach Problems and Solutions and Multiple Choice Questions MCQs Financial Reporting & Analysis Lawrence Revsine, Daniel W. Collins, W. Bruce Johnson, 1999 Many headlines in today's leading business publications talk about how managers are cooking the books to meet earnings targets or analysts earnings projections How can managers utilize the flexibility in GAAP to manipulate the numbers for their own purposes How can analysts learn how to uncover the hidden truths behind reported accounting numbers and interpret financial statements correctly Financial Reporting Analysis by Revsine Collins Johnson emphasizes both the process of financial reporting and the analysis of financial statements This book employs a true user perspective by discussing the contracting and decision implications of accounting and this helps readers understand why accounting choices matter and to whom Revsine Collins and Johnson train their readers to be good financial detectives able to read use and interpret the statements and most importantly understand how and why managers can utilize the flexibility in GAAP to manipulate the numbers for their own purposes Extensive real world examples are designed to build interest and expand understanding not only of current practices but also how to make comparisons between firms For example See how the Regina Company's management team manipulated the numbers in the annual report to suggest a 10.9 million profit when they had actually lost 16.8 million chapter 1 Discover how Kmart Corporation managers used legitimate accounting means to keep a substantial portion of their leases off the balance sheet to enhance their reported return on assets and debt equity ratio and then see how Revsine Collins and Johnson use financial statement footnotes to undo this accounting choice and put the numbers back onto the balance sheet Chapter 11 See what happened at Bausch Lomb when managers treated shipments of products to distributors as final sales Managers who have not used this text would only know how that receivables increased whereas financial detectives learning from Revsine Collins and Johnson would know that something was amiss when collections slowed and receivables increased faster than sales Chapter 7 FR A perfectly meets the guidelines for the new 150 hour requirement for CPA certification through the development of analytical and conceptual thinking problem solving and understanding of why accounting really matters Moreover because of its unique user focus and analysis orientation this book is well suited for preparing for all levels of the Chartered Financial Analysts CFA exam Readers will be better prepared for both the CPA and CFA exams because of the extensive in chapter technical material and end of chapter problems and real world cases

REVIEWS Partha Mohanram NYU This book makes a great tool to teach both Intermediate Accounting as well as Financial Statement Analysis It is particularly useful as a single text that bridges across both these courses as we use it at NYU Paul Zarowin NYU I feel that the book is excellent for both the student who is preparing for the CPA exam and for the student who is preparing to become an analyst on Wall Street Jose Juarez The book combines solid theory with practical analysis which creates an excellent accounting foundation for the investment professional *Financial Reporting and Analysis* Lawrence Revsine, 2003-03-28 **Financial Accounting: Reporting, Analysis and Decision Making, 8th**
