2. Which one of the following statements is NOT of correct?

- a. With the introduction of integral control, the steady state error increases
- b. The generalised error coefficients provide a simple way of determining the nature of the response of a feedback control to any arbitrary input
- c. The generalized error coefficients lead to calculation of complete steady state response without actually solving the system differential equation
- d. For a type-1 system, the steady state error for acceleration input is infinite

3. Consider the following statements with reference to the root loci of the characteristic equation of unity feedback control system with an open loop transfer function of

$$G(s) = \frac{(s+1)(s+3)(s+5)}{s(s+2)}$$
