The report lists Andrew's traits and corresponding scores in descending order for each trait category. The trait definitions are to the right of each trait. If a position was selected when running this report, the traits related to the position will be highlighted in green for Essential Traits, blue for Desirable Traits, and red for Traits to Avoid that could hinder Andrew's performance.

The suitability assessment includes a technological 'consistency detector' that indicates the reliability of results by analyzing the consistency of the answers on the questionnaire. Andrew's consistency score is 96 which indicates that Andrew is 99% consistent in answering the questionnaire. This indicates a high likelihood that Andrew was truthful, accurately self-aware, and able to concentrate on the questionnaire.

A single asterisk, *, indicates that there are some inconsistencies related to this trait, but the result is probably reliable. A double asterisks, **, indicates that there are some inconsistencies related to this trait, and the result is probably questionable.
