Visualisation and Epistemological Access to Mathematics Education in Southern Africa

Marc Schäfer, 2023-04-27 This book demonstrates that using visualisation processes in mathematics education can help to enhance teaching and learning and bridge the inequality gap that exists between well resourced and under resourced schools in Southern Africa Drawing on classroom research conducted in the Southern African region it examines how epistemological access in a context of gross inequality can be constructively addressed by providing research based solutions and recommendations The book outlines the visualisation process as an integral but often overlooked process of mathematics teaching and learning It goes beyond the traditional understanding of visualisation processes such as picture forming and using tools and considers visualisation processes that are semiotic in nature and includes actions such as gestures in combination with language It adds value to the visualisation in mathematics education research discourse and deliberation in Africa With a unique focus on Southern Africa and open avenues for further research and collaboration in the region it will be a highly relevant reading for researchers academics and post graduate students of mathematics education comparative education and social justice education

Research in Education, 1971 *Second International Handbook of*

Mathematics Education Alan Bishop, M.A. (Ken) Clements, Christine Keitel-Kreidt, Jeremy Kilpatrick, Frederick Koon-Shing Leung, 2012-02-02 ALAN 1 BISHOP The first International Handbook on Mathematics Education was published by Kluwer Academic Publishers in 1996 However most of the writing for that handbook was done in 1995 and generally reflected the main research and development foci prior to 1994 There were four sections 36 chapters and some 150 people contributed to the final volume either as author reviewer editor or critical friend The task was a monumental one attempting to cover the major research and practice developments in the international field of mathematics education as it appeared to the contributors in 1995 Inevitably there were certain omissions some developments were only starting to emerge and some

literatures were only sketchy and speculative However that Handbook has had to be reprinted three times so it clearly fulfilled a need and I personally hope that it lived up to what I wrote in its Introduction The Handbook thus attempts not merely to present a description of the international state of the field but also to offer synthetic and reflective overviews on the different directions being taken by the field on the gaps existing in our present knowledge on the current problems being faced and on the future possibilities for development Bishop et al 1996 Since that time there has been even more activity in our field and now seems a good time to take stock again to reflect on what has happened since 1995 and to create a second Handbook with the same overall goals

Assessing Writing Across the Curriculum Charles R. Duke, Rebecca Sanchez, 2001 Assessing Writing Across the Curriculum offers guidelines for effective assessment of student writing performance in various content areas such as English science mathematics and social studies at the junior or senior high school level The book suggests a change in teaching methodology in order to make writing a key part of the instructional process Written by teachers it offers examples of applications and tools for assessment concluding with a list of additional resources for further research Assessing Writing Across the Curriculum addresses issues such as assignment design communication of expectations scoring rubric design and student involvement in writing assessment It emphasizes writing to learn versus writing to test This change in emphasis allows the student to understand how writing can contribute to his or her thinking and learning about a subject The book utilizes the knowledge editors Duke and Sanchez have accumulated in directing National Writing Project sites and in their extensive in service work on writing assessment with teachers
