
Physics Final Study Guide Question and answers already passed 2025/2026

What will a passenger experience when a plane is struck by lightning? - correct answer ✓ The passenger will not feel anything but will hear a loud boom

A negative charge, if free, will tend to move - correct answer ✓ from low potential to high potential

A positive point charge Q is fixed on a very large horizontal frictionless tabletop. A second positive point charge q is released from rest near the stationary charge and is free to move. What is the motion of q after it is released? - correct answer ✓ As it moves farther and farther from Q , its speed will keep increasing.

A closed three-dimensional surface is so constructed that, at all points on the surface, the electric field vector points inward. Therefore - correct answer ✓ the surface encloses a net negative charge.

An electrically neutral conductor is given a positive charge by the process of induction. In principal, how is the object's mass affected? - correct answer ✓ it decreases

T/F: If the electric flux through a closed surface is zero, the electric field at all points on that surface must be zero - correct answer ✓ False

T/F: If the electric potential in a region is constant, the electric field must be zero everywhere in that region. - correct answer ✓ True

When two or more capacitors are connected in series across a potential difference - correct answer ✓ the potential difference across the combination is the algebraic sum of the potential differences across the individual capacitors
