programs and targeted case studies of selected states and other private or semi government agencies involved in driver education curriculum development and implementation It is the recommendation of this report that Arizona continue its on going efforts to convene a driver education task force consisting of both Arizona Department of Education and Motor Vehicle Department representatives with the goal of developing uniform standards for both driver education curriculum and training for driver education instructors to apply to both the public school driver education program and the professional driver training schools In addition because Arizona does not have an existing state level driver education curriculum the state should adopt a complete driver education curriculum as opposed to a module geared towards adverse driving conditions That said should that effort not be possible it is the recommendation of this report that one of the two adverse conditions related modules Montana or Texas Virginia Both of these modules are well designed and thorough and both would serve Arizona well They are similar in their coverage of adverse driving conditions The choice between the two would come down to Arizona s preference between the NIDB model with which the Montana curriculum is more closely aligned and the ADTSEA model with which the Virginia Texas module is more closely aligned **Rollover, Side and Rear Impact** ,2004 Contains the most current work in the areas of rollover side and rear impact Pref **Road & Track** ,1975-02
