Gauteng Geography Paper 1 Scope:

The Geography of South Africa Jasper Knight, Christian M. Rogerson, 2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa but also of relevance to other areas of the Global South All chapters are original contributions providing a state of the art research baseline on key themes in physical human and environmental geography and in understanding the changing geographical landscapes of modern South Africa These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world including issues of sustainable development and growth in the Global South

Transportation, Land Use and Integration I.M. Schoeman, 2017-05-30 For many years the integration of the location of land use and activities in spatial systems as well as the provision of transport in movement of goods services and people has been recognized as a challenge amongst various specialists including engineers transportation planners economists environmentalists urban and regional planners and developers The purpose of this book is to address transportation modelling in terms of technology techniques and methodology application in context to the interface between transportation systems land use planning and environmental challenges and application The methodology of transportation modelling is applied to international practices and application based on specific case studies inclusive of public transportation projects transportation modelling techniques in practice international research agenda network design and channel strategies strategic planning application of technology in traffic surveys and interpretation emissions from transportation systems application of mathematical models and the interface between environment land use and development in terms of location in space and the resulting activities Of value to both theorists and practitioners this book references the integration of transportation modelling techniques within an interdisciplinary environment inside all spatial systems

The Changing Space Economy of City-Regions Koech Cheruiyot, 2017-10-30 This book addresses the South African Space Economy and its stark disparities and dualisms through an assessment of the Gauteng City Region the largest economic agglomeration in the country and on a continent bedevilled by a myriad of development challenges The book s focus on understanding the overall character of Gauteng City Region s Space Economy through data mining analysis and mapping comprehensively supplements the Space Economy literature on the region It covers the disparities exacerbated by an overlay of apartheid planning ideology and top down regional development based on selective encouragement of manufacturing investments in growth points or poles and how implementation of past policies intended to cure these disparities have yielded mixed results This book further offers the Gauteng City Region as a microcosm of the national economy in the form of evident significant placed based variations in the intensity and character of economic structure that on the one hand enjoys massive agglomeration economies while on the other has high levels of poverty and large numbers of people living below the Minimum Living Level This book should appeal

to urban studies specialists economists and development studies researchers in the Global South
