I. F. David, K. Shankland, L. B. McCusker, Ch. Baerlocher, 2006-08-03 The art of solving a structure from powder diffraction data has developed rapidly over the last ten years to the point where numerous crystal structures both organic and inorganic have been solved directly from powder data However it is still an art and in contrast to its single crystal equivalent is far from routine The art lies not only in the correct application of a specific experimental technique or computer program but also in the selection of the optimal path for the

problem at hand Written and edited by experts active in the field and covering both the fundamental and applied aspects of structure solution from powder diffraction data this book guides both novices and experienced practitioners alike through the maze of possibilities
