Life Sciences Paper Memorandum June:

Global Transformations in the Life Sciences, 1945–1980 Patrick Manning, Mat Savelli, 2018-06-07 The second half of the twentieth century brought extraordinary transformations in knowledge and practice of the life sciences In an era of decolonization mass social welfare policies and the formation of new international institutions such as UNESCO and the WHO monumental advances were made in both theoretical and practical applications of the life sciences including the discovery of life's molecular processes and substantive improvements in global public health and medicine Combining perspectives from the history of science and world history this volume examines the impact of major world historical processes of the postwar period on the evolution of the life sciences Contributors consider the long term evolution of scientific practice research and innovation across a range of fields and subfields in the life sciences and in the context of Cold War anxieties and ambitions Together they examine how the formation of international organizations and global research programs allowed for transnational exchange and cooperation but in a period rife with competition and nationalist interests which influenced dramatic changes in the field as the postcolonial world order unfolded **Paper**, 1990 On the Shoulders of Titans Barton C. Hacker, James M. Grimwood, 1977 Life in Space Maura Phillips Mackowski, 2022-05-24 This book explores the many aspects and outcomes of NASA's research in life sciences a little understood endeavor that has often been overlooked in histories of the space agency **The Politics of Precaution** Robert L. Paarlberg, 2001-09-17 Genetically modified GM food crops have inspired increasing controversy over the past decade By the mid 1990s they were widely grown in the U S Canada and Argentina but precautionary regulations continue to limit their use elsewhere The restrictive policies of Europe and Japan toward GM crops have been much discussed Less attention has been paid to the policies affecting the adoption of GM crops in the developing world where their potential impact on the availability and quality of food is even greater In this book Robert Paarlberg looks at the policy choices regarding GM food made by four important developing countries Kenya Brazil India and China Of these so far only China has approved the planting of GM crops Paarlberg identifies five policy areas in which governments of developing countries can either support or discourage GM crops intellectual property rights biosafety trade food safety and public research and investment He notes that highly cautious biosafety policies have so far been the key reason that Kenya Brazil and India have hesitated to plant GM crops These cautious policies have been strongly reinforced by international market forces and international diplomatic and NGO pressures China has been less cautious toward GM crops in part because there is less opportunity in China for international organizations or independent critics of GM crops to challenge official policy **Poison Powder** Gregory S. Wilson, 2023-04-01 In 1975 workers at Life Science Products a small makeshift pesticide factory in Hopewell Virginia became ill after exposure to Kepone the brand name for the pesticide chlordecone They made the poison under contract for a much larger Hopewell company Allied Chemical Life Science workers had been breathing in the dust for more than a year

Ingestion of the chemical made their bodies seize and shake News of ill workers eventually led to the discovery of widespread environmental contamination of the nearby James River and the landscape of the small working class city Not only had Life Science dumped the chemical but so had Allied when the company manufactured it in the 1960s and early 1970s The resulting toxic impact was not only on the city of Hopewell but also on the faraway fields where Kepone was used as an insecticide Aspects of this environmental tragedy are all too common corporate avarice ignorance and regulatory failure combined with race and geography to determine toxicity and shape the response But the Kepone story also contains some surprising medical legal and political moments amid the disaster With *Poison Powder* Gregory S Wilson explores the conditions that put the Kepone factory and the workers there in the first place and the effects of the poison on the people and natural world long after 1975 Although the manufacture and use of Kepone is now banned by the Environmental Protection Agency organochlorines have long half lives and these toxic compounds and their residues still remain in the environment

McDougall-Waters, Camilla Mørk Røstvik, 2022-10-03 Modern scientific research has changed so much since Isaac Newton's day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers Yet the use of scientific journals to report share and store results is a thread that runs through the history of science from Newton's day to ours Scientific journals are now central to academic research and careers Their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published The journal that reported Newton's optical experiments still exists First published in 1665 and now fully digital the *Philosophical Transactions* has carried papers by Charles Darwin Dorothy Hodgkin and Stephen Hawking It is now one of eleven journals published by the Royal Society of London Unrivalled insights from the Royal Society's comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing The editorial management business practices and financial difficulties of the *Philosophical Transactions* and its sibling *Proceedings* reveal the meaning and purpose of journals in a changing scientific community At a time when we are surrounded by calls to reform the academic publishing system it has never been more urgent that we understand its history
