

Life Without Technology

3 pages | 541 words

If someone told me that I would have to be technology-free for 24 hours I would probably have asked them for a tranquilizer so I could sleep through the horrid day. From the moment my alarm clock goes off in the morning to the time I set it at night I am using some sort of technology. I couldn't even eat lunch at school without the help of those little machines that take our meal plans. Last week I did my best and tried as hard as I could to be free from technology. Obviously, being at college made it impossible but it was a good experience nonetheless.

After my alarm goes off, it's time to take a shower. The lights aren't necessary so I leave them off. I come back from my shower with sopping wet hair and decide to suck it up and leave the blow dryer in the closet. It's Monday so I only have one class, which means I have more time to torture myself. On the way to lunch my roommate and I take the stairs; I live on the 7th floor so we know this won't last long. On my way out I contemplate whether or not the lock on our mailboxes is too technologically advanced for me to use.

Honestly, I would have to admit that my day was not all that bad. My wet hair eventually dried itself from running up and down the seven flights of stairs. There is so much that we take for granted it is unbelievable. Even if I wanted to be absolutely free from technology I couldn't. Lights are on everywhere you go and someone always wants you to listen to the message on their cell phone from their boyfriend. There are unavoidable motion sensor lights and unavoidable automatic doors. Car trips, if driving in the car were even allowed, would be extremely boring not to mention dangerous.

Without traffic signals there would be a lot of accidents; for some reason I don't think people would pay attention to little men in bright orange vests waving flags. I am convinced that without technology smoking and drug use would increase and people would be fat. While people would be forced to walk most places I think that they would just choose to stay closer to home. Sleeping would probably take precedence over most activities, except maybe those associated with reproduction. So basically if you think about it the world would literally be one big, fat, high, drunk family.

On Mondays I have geography and my teacher lectures with the help of PowerPoint. Since there is no way I can copy notes from just listening I once again must give in to the machine. On the way back from class my roommate and I cut through the Science building to make our trip shorter. It isn't until I am through the second door that I realize the doors are handicapped accessible and automatic. It's amazing the little things we take for granted. When I get back to the room, seven...
