MATLAB Implementation of the Steganographic Algorithm F5 Wassim Al Chamaa, 2019-05-07 Project Report from the year 2018 in the subject Computer Science Programming language English abstract The F5 algorithm proposed by Westfeld is still one of the most known algorithms in the field of DCT based steganography It can make a JPEG image a container of a secret message where no one knows the presence of the message except the sender and the intended receiver In this programming work we show how to realize the F5 algorithm via Matlab We present the block diagrams of embedding and extracting processes and the entire Matlab code of the F5 algorithm Some Notes about the F5 Matlab code 1 The implementation code works according to the method proposed by Andreas Westfeld in his paper F5 A Steganographic Algorithm High Capacity Despite Better Steganalysis Huffman coding and decoding are implemented using the Matlab JPEG Toolbox developed by Phil Sallee 2 The two part Matlab code included in the report embedding and extracting parts can be executed in Matlab IDE The embedding part reads the cover JPEG file and the message file we want to hide then it creates a Stego JPEG file according to the F5 algorithm On the other side The extracting part reads the Stego JPEG file and then it extracts the hidden message file 3 The F5 code calls the main two functions of Phil Sallee s Matlab Toolbox JPEG reading and writing These functions make it easier to access and manipulate the quantized DCT coefficients of

a given JPEG file Using Sallee s Toolbox should accord with the used operating system whether it is 32 or 64 bits 4 The F5 code contains the function to form the image matrix to show the input and output images Running this function requires ALL the Sallee s Toolbox to be installed Otherwise the user can REMOVE this function from the code since it doesn t affect the main F5 process and thus keep ONLY using the main two function of the Sallee s Toolbox 5 The message file we want to hide can be any file of any kind and whatever its extension The size of the message file should be appropriate for the size of the used cover JPEG image so no errors will occur when executed *Conference Proceedings* ,1996 EUROMICRO 99, Proceedings of the 25th EUROMICRO Conference ,1999 Annotation This is a two volume set of the proceedings of the September 1999 conference on the current and future developments in informatics theories and application areas Volume I 80 contributions discusses digital system design architectures and methods and tools Volume II 30 contributions covers music technology and audio processing dependable computing systems software process and product improvement multimedia and telecommunication and network computing Lacks a subject index Annotation copyrighted by Book News Inc Portland OR Fault Tolerance Analysis and Design for JPEG-JPEG2000 Image Compression Systems Cung Nguyen,2004

**Video Processing and Communications** Yao Wang,Jörn Ostermann,Ya-Qin Zhang,2002 Useful as a reference work this book offers a good balance between theoretical concepts and practical solutions with more rigorous formulation of certain problems such as motion estimation sampling basic coding theory Provides an in depth exposition of fundamental theory and techniques for video processing including frequency domain characterization of video signals and visual perception video sampling and format conversion two dimensional and three dimensional motion estimation Also presents techniques important for video communications including video coding and error control and up to date coverage on recent international standards on video communications A chapter is devoted to video streaming over Internet and wireless networks one of the most popular video communication applications In addition it discusses processing and communications of stereoscopic and multiview video Practicing researchers and engineers **Proceedings** ,1996 **Automatic Target Recognition** ,1999
