Discovering Science Through Inquiry: Matter Kit Rachel E. Green, 2010-05-12 The Discovering Science through Inquiry series provides teachers and students of grades 3-8 with direction for hands-on science exploration around particular science topics and focuses. The series follows the 5E model: engage, explore, explain, elaborate, evaluate. The Matter kit provides a complete inquiry model for the exploration of the structure and properties of matter through supported investigation. Encourage students through activities such as studying the chemical properties of matter and investigating whether household items are acids and bases. Matter kit includes 16 Inquiry Cards in print and digital formats, Teacher's Guide, Inquiry Handbook. Each kit includes a single copy; additional copies can be ordered. Digital resources include PDFs of activities and additional teacher resources including images and assessment tools, leveled background pages for students, and video clips to support both students and teachers. What We Think About When We Try Not To Think About Global Warming Per Espen Stoknes,2015-04-03 Why does knowing more mean believing and doing less A prescription for change The more facts that pile up about global warming the greater the resistance to them grows making it harder to enact measures to reduce greenhouse gas emissions and prepare communities for the inevitable change ahead It is a catch 22 that starts says psychologist and economist Per Espen Stoknes from an inadequate understanding of the way most humans think act and live in the world around them With dozens of examples from the private sector to government agencies Stoknes shows how to retell the story of climate change and at the same time create positive meaningful actions that can be supported even by deniers In *What We Think About When We Try Not To*

Think About Global Warming Stoknes not only masterfully identifies the five main psychological barriers to climate action but addresses them with five strategies for how to talk about global warming in a way that creates action and solutions not further inaction and despair These strategies work with rather than against human nature They are social positive and simple making climate friendly behaviors easy and convenient They are also story based to help add meaning and create community and include the use of signals or indicators to gauge feedback and be constantly responsive Whether you are working on the front lines of the climate issue immersed in the science trying to make policy or educate the public or just an average person trying to make sense of the cognitive dissonance or grapple with frustration over this looming issue What We Think About When We Try Not To Think About Global Warming moves beyond the psychological barriers that block progress and opens new doorways to social and personal transformation
