Applied Probability Models Do Le Minh,2001 Intended for a course in Probability Models at the undergraduate or graduate level this book is designed for those who will actually use probability and is designed to fit diverse audiences business students applied engineering students and biology students The course focuses on applications of probability through the presentation of models rather than theory alone In this practical and interesting book author Do Le Paul Minh provides accessible coverage for a course in probability models Minh motivates the material with interesting application problems relating to medicine business and engineering many of which are based on real studies and applications

Throughout the book he thoughtfully integrates the use of computers and spreadsheets to solve problems      **Perpetual Trouble Shooter's Manual** John Francis Rider,1935      **Mathematical Frameworks For Component Software: Models For Analysis And Synthesis** Zhiming Liu,Jifeng He,2006-11-29

The range of components technology is both wide and diverse but some common understanding is emerging through the ideas of model based development These include the notions of interfaces contracts services connectors and architectures Key issues in the application of the technology are becoming clearer including the consistent integration of different views of a component component composition component coordination and transformation for platforms However we still know little about theories that support analysis and synthesis of component based systems The distinct feature of this volume is its focus on mathematical models that identify the core concepts as first class modeling elements and its providing of techniques for integrating and relating them The volume contains eleven chapters by well established researchers writing from different perspectives Each chapter gives explicit definitions of components in terms of a set of key aspects and addresses some of the problems of integration and analysis of various views component specification component composition component coordination refinement and substitution and techniques for solving problems The concepts and techniques are motivated and explained with the help of examples and case studies
