Generic Ideo Manual:

Local TV Annie Laurie Sullivan, Lauren Herold, 2025-10-15 *Local Television Histories: Communities and Aesthetics* offers critical analyses of an expansive range of practices, policies, and debates in local television histories from the United States. Television is typically perceived as a commercial and/or national form of communication with the potential to reach millions of viewers. Yet from the earliest years of television through the present, communities have participated in the production of television creating media relevant to their needs and concerns. This collection broadens our notion of what this medium can achieve, allowing for innovative representation and community use that disrupts the political, economic, national, and social norms of mainstream offerings. Rather than a comprehensive historical survey, which given the sheer number of local television productions would be impossible, we've curated methodologically distinctive chapters that assess the possibilities and limitations of television's mission to serve local publics. In doing so, we are attentive to the idiosyncratic histories, technologies, and functions of local television that have emerged in different cities over the course of the 20th and 21st Century. We likewise amplify the use of television by marginalized groups whose perspectives are too often sidelined or distorted in mainstream fare as a site for community formation, cultural expression, civic engagement, and political action.

Male Call Jonathan Auerbach, 1996. When Jack London died in 1916 at age forty, he was one of the most famous writers of his time. Eighty years later, he remains one of the most widely read American authors in the world. The first major critical study of London to appear in a decade, *Male Call* analyzes the nature of his appeal by closely examining how the struggling young writer sought to promote himself in his early work as a sympathetic romantic man of letters whose charismatic masculinity could carry more significance than his words themselves. Jonathan Auerbach shows that London's personal identity was not a basis of his literary success but rather a consequence of it. Unlike previous studies of London that are driven by the author's biography, *Male Call* examines how London carefully invented a trademark self in order to gain access to a rapidly expanding popular magazine and book market that craved authenticity, celebrity power, and personality. Auerbach demonstrates that only one fact of London's life truly shaped his art: his passionate desire to become a successful author. Whether imagining himself in stories and novels as a white man on trail in the Yukon, a sled dog, a tramp, or a professor, or engaging questions of manhood and mastery in terms of work, race, politics, class, or sexuality, London created a public persona for the purpose of exploiting the conventions of the publishing world and marketplace. Revising critical commonplaces about both Jack London's work and the meaning of nature within literary naturalism and turn-of-the-century ideologies of masculinity, Auerbach's analysis intriguingly complicates our view of London and sheds light on our own postmodern preoccupation with celebrity. *Male Call* will attract readers with an interest in American studies, American literature, gender studies, and cultural studies.
