

Concepts: Patterns in Triangles

Many more mathematical relationships are produced by the placement of tangents to the escribed circle with vertices than producing all arithmetic relationships between the greatest and least angles in a triangle.

Students are advised that the triangles are used here as vehicles for the study of tangents. There are small triangles below each one, a primary one and a secondary one. About sixteen tangents are used. However, students are advised to draw a primary one and a secondary one. The primary one is used in the study of tangents and the secondary one is used in the study of the greatest and least angles. The primary one is used in the study of tangents and the secondary one is used in the study of the greatest and least angles.

1. A triangle is given with its escribed circles and a primary one and a secondary one.
