

Directions: Calculate the Gravitational Potential Energy (GPE), Kinetic Energy (KE), and Mechanical Energy (ME) at different positions for the **530 kg** pendulum bob. Record units in Joules. Then answer the questions below the data table. Assume that friction and air resistance is negligible.

* Use 9.8 m/s^2 for g

Position →	A	B	C	D	E
GPE					
KE					
ME					

1. Why does the total mechanical energy (GPE + KE) remain the same at all five positions, even though the pendulum's GPE and KE individually change?
2. At which points does the pendulum have maximum potential energy, and at which points does it have maximum kinetic energy? How does this illustrate energy conversion?
3. What assumptions (such as neglecting friction and air resistance) must be satisfied for the pendulum's total mechanical energy to stay constant throughout its swing?

The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
