John Fleming Explicit Instruction:

School Reform in an Era of Standardization Ian Hardy, 2020-12-29 School Reform in an Era of Standardization explores how teachers and school based administrators navigate the processes of accountability and standardization in schooling systems and settings It provides clear insights into how the work and learning of teachers and students in schools have been dramatically reconstituted by increased pressures of external political scrutiny and accountability The book reveals in detail the nature and effects of standardization processes upon schools and schooling systems Specifically it shows how curriculum development teaching and assessment practices have all been recalibrated under conditions of increased external scrutiny of teacher and student work and learning and how such processes are manifest in curriculum dominated by attention to literacy and numeracy more scripted pedagogies and standardized testing However the research not only elaborates the detrimental effects of such processes but also how those responsible for educating in schools teachers heads of curriculum deputy principals and principals have responded proactively by interpreting interrogating and challenging these conditions In this way it provides resources for hope evidence of what are described as more authentic accountabilities and at the same time it provides a clear portrait of the difficulty of fostering substantive curriculum teaching and assessment reform during an era of increasingly reductive accountability processes It will be an invaluable resource for understanding and enhancing practices in schools and school systems in the decades to come and for giving hope to educators in the ongoing work of rebuilding trust in public education

Re-Imagining

Educational Leadership Brian Caldwell, 2006-11-18 If one is concerned with the future of education this book is a must. While it is humbling it is also an inspirational invitation for transformation. *Florida Journal of Educational Administration Policy*. It is clear that school leadership has had to adapt to the changing educational climate and this has required changes at all levels as well as shifts in balance. This book addresses these challenges and demonstrates a variety of illustrative examples of how successful these changes can be. This is a useful primer for those studying leadership in schools and some of the associated theories and practice. There are wide and well considered references across the educational and management landscape and it provides thought provoking views on how leadership can be practised. *ESCalate*. The fact that we know you are watching Brian helps all of us both to perform well in the present and to invent a future in which we perform better still. I commend Brian's writings to anyone committed to world class public education. Professor Sir Michael Barber, Expert Partner, Global Public Sector Practice, McKinsey and Company, Former Head of Prime Minister's Delivery Unit at 10 Downing Street.

In Re imagining Educational Leadership Brian Caldwell has set an outstanding framework for school leaders and educators to fundamentally rethink schools and school leadership. The book is very perceptive and links ideas and concepts to the practical reality of schools in an inspiring and imaginative way. This is a must read book for all those involved in developing inspiring leadership in our schools. This is a major contribution to the educational literature. Professor Brent Davies, Professor of International Leadership Development at the University of Hull. Brian Caldwell has successfully brought together an analysis of past and current practice in leadership but most significantly he has outlined key thoughts, ideas and perspectives to inspire leaders in their personal learning journey in the future. This book will become one of the key sources of ideas for leadership in schools over the next few years. It is both accessible and thought provoking while never losing the practical relevance to schools and school leaders. This is a must read for all those involved in educational leadership and 21st century schooling. *International Journal of Educational Management*. We do not know the precise form that education will take in different settings in 25 years time. No one does. No one should claim to have this foresight. Leadership is required however regardless of the form that education takes. In this book Brian Caldwell draws on his work on self managing schools, his most recent work in the UK with the Specialist Schools and Academies Trust and on evidence from around the world to describe how leadership is changing the world of education on a scale that can best be described as transformation. Such leadership differs in important ways from what has been expected in the past; it requires a change in role at all levels and shifts the balance from what is often a dispiriting and discouraging experience to one that is exhilarating. The author's insight and recommendations are essential reading for all school leaders, potential school leaders and policy makers at local and national levels who seek to secure high levels of achievement for all students in all settings.
