

Chapter Notes: Gravitation

What is Gravitation?

Gravitation is the universal phenomenon where every object in the universe attracts every other object. This attractive force between any two objects is referred to as the "force of gravitation." Although the gravitational force is weak and typically requires substantial masses to be observed, it acts over long distances.

Gravitation

Gravitation is the Force of Attraction Acting Between Any Two Bodies of the Universe.

Gravity

Gravitation is the Earth's Gravitational Pull on a Body, Lying on Near the Surface of Earth.

Gravitation and Gravity

Centripetal Force

Centripetal force is like glue that keeps things moving in a circle. Imagine a merry-go-round: as it spins faster, it's harder to hold on. This force pulls things towards the center to keep them in the circular path. It balances with another force, making things stay put.

Gravitation Target Notes

S Ashworth

Gravitation Target Notes:

Thank you utterly much for downloading **Gravitation Target Notes**. Most likely you have knowledge that, people have look numerous time for their favorite books following this Gravitation Target Notes, but end going on in harmful downloads.

Rather than enjoying a fine book once a mug of coffee in the afternoon, on the other hand they juggled taking into account some harmful virus inside their computer. **Gravitation Target Notes** is easy to use in our digital library an online admission to it is set as public suitably you can download it instantly. Our digital library saves in merged countries, allowing you to get the most less latency era to download any of our books subsequent to this one. Merely said, the Gravitation Target Notes is universally compatible once any devices to read.
