

Grease Interchange Guide

Industrial Greases

Industrial greases are designed for use in a wide range of applications, from heavy-duty machinery to light-duty equipment. They are formulated to provide excellent lubrication and protection against wear and tear. Industrial greases are available in a variety of grades and types, including lithium-based, calcium-based, and sodium-based greases. They are typically used in applications such as bearings, gears, and shafts.

Automotive Greases

Automotive greases are specifically formulated for use in vehicles and other transportation equipment. They are designed to provide excellent lubrication and protection against wear and tear in high-temperature and high-load environments. Automotive greases are available in a variety of grades and types, including lithium-based, calcium-based, and sodium-based greases. They are typically used in applications such as wheel bearings, chassis components, and engine parts.

Marine Greases

Marine greases are formulated for use in marine environments, where they must provide excellent lubrication and protection against corrosion and water ingress. Marine greases are available in a variety of grades and types, including lithium-based, calcium-based, and sodium-based greases. They are typically used in applications such as outboard motors, inboard engines, and other marine equipment.

Specialty Greases

Specialty greases are formulated for use in specific applications, such as high-temperature environments, high-speed applications, and applications requiring extreme load capacity. Specialty greases are available in a variety of grades and types, including lithium-based, calcium-based, and sodium-based greases. They are typically used in applications such as industrial machinery, heavy-duty equipment, and specialized machinery.

Food-Grade Greases

Food-grade greases are formulated for use in food processing and other applications where food safety is a concern. They are designed to provide excellent lubrication and protection against wear and tear, while also being safe for consumption. Food-grade greases are available in a variety of grades and types, including lithium-based, calcium-based, and sodium-based greases. They are typically used in applications such as food processing machinery, bakery equipment, and other food-related equipment.

High-Temperature Greases

High-temperature greases are formulated for use in applications where the operating temperature is high, such as in industrial machinery and heavy-duty equipment. They are designed to provide excellent lubrication and protection against wear and tear, even at high temperatures. High-temperature greases are available in a variety of grades and types, including lithium-based, calcium-based, and sodium-based greases. They are typically used in applications such as industrial machinery, heavy-duty equipment, and specialized machinery.
