Justice in Health Camille Burnett, 2022-11-26 Inequities and health disparities are the greatest and most pressing social issues of our time This book explores public health practice through the critical lens of social and structural justice by examining our approach to health and what it means to be healthy systemically and structurally Through recent events the raw reality of health disparities and inequities have been exposed These events are earmarked by COVID 19's decimating and disparate impacts on Black and Brown populations during one of the greatest social movements of our time to end racism Since this very public explosion of intersecting forms of oppression and inequitable suffrage many have clamored to make sense of it to reframe our narratives toward action and re envision what progress and change could look like This text is positioned as a tool to help professionals dismantle old ways of thinking while reconstructing new ones that can be more responsive in meeting the realities of today The author challenges the reader to think about public health more deeply and pragmatically as the space for reconciling solutions to these poignant health issues This requires the exploration

of an ideological shift in how we think of health how we prepare healthcare providers outside of an antiquated sick care system and how we prioritize the determinants of health across a re imagined continuum of care The scope of this book ranges from a historical and structural examination of our beliefs about health to perceiving a more just system of care where health is intentionally co created toward this aim It intentionally explores health along the lines of equity and through the broader lens of the social determinants of health to shed light on the opportunity in this moment that public health creates for health care Justice in Health is a timely and important resource for healthcare professionals pre and post licensure and healthcare decision makers The book also appeals more widely to instructors academics researchers and students across disciplines of nursing medicine public health sociology and social work
