Primary Science Education in East Asia Yew-Jin Lee, Jason Tan, 2018-09-26 This edited volume is a state of the art comparison of primary science education across six East Asian regions namely the People s Republic of China Republic of Korea Republic of China

Hong Kong SAR Japan and Singapore While news of educational policies classroom teaching assessment and other educational innovations here often surface in the international media this book brings together for the first time relevant information regarding educational systems and strategies in primary science in East Asia Above all it is a readable yet comprehensive survey readers would have an accurate sense of what has been accomplished what has not worked so well and what remains to be done Invited experts in comparative education research and or science education also provide commentary by discussing common themes across the six regions These types of critical synoptic reviews add much value by enabling readers to understand broad commonalities and help synthesize what must surely be a bewildering amount of very interesting albeit confusing body of facts issues and policies Education in East Asia holds many lessons both positive and negative to offer to the rest of the world to which this volume is a timely contribution to the literature **POGIL** Shawn R. Simonson, 2023-07-03

Process Oriented Guided Inquiry Learning POGIL is a pedagogy that is based on research on how people learn and has been shown to lead to better student outcomes in many contexts and in a variety of academic disciplines Beyond facilitating students mastery of a discipline it promotes vital educational outcomes such as communication skills and critical thinking Its active international community of practitioners provides accessible educational development and support for anyone developing related courses Having started as a process developed by a group of chemistry professors focused on helping their students better grasp the concepts of general chemistry The POGIL Project has grown into a dynamic organization of committed instructors who help each other transform classrooms and improve student success develop curricular materials to assist this process conduct research expanding what is known about learning and teaching and provide professional development and collegiality from elementary teachers to college professors As a pedagogy it has been shown to be effective in a variety of content areas and at different educational levels This is an introduction to the process and the community Every POGIL classroom is different and is a reflection of the uniqueness of the particular context the institution department physical space student body and instructor but follows a common structure in which students work cooperatively in self managed small groups of three or four The group work is focused on activities that are carefully designed and scaffolded to enable students to develop important concepts or to deepen and refine their understanding of those ideas or concepts for themselves based entirely on data provided in class not on prior reading of the textbook or other introduction to the topic The learning environment is structured to support the development of process skills such as teamwork effective communication information processing problem solving and critical thinking The instructor s role is to facilitate the development of student concepts and process skills not to simply deliver content to the students The first part of this book introduces the theoretical and philosophical foundations of POGIL pedagogy and summarizes the literature demonstrating its efficacy The second part of the book focusses on implementing POGIL covering the formation and effective management of student teams offering guidance on the selection and writing of POGIL activities as well as on facilitation

teaching large classes and assessment The book concludes with examples of implementation in STEM and non STEM disciplines as well as guidance on how to get started Appendices provide additional resources and information about The POGIL Project

Application of Antigen Cross-Presentation Research into Patient Care Marianne Boes,2017-05-16 The activation of adaptive immune responses requires the processing and presentation of protein antigens to lymphocytes Especially dendritic cells are effective at display of antigen derived peptides in the form of immunogenic peptide MHC complexes to CD4 and CD8 positive T cells and can stimulate even naive T cells to clonally expand During the last 40 years mechanisms that facilitate antigen processing and presentation were clarified mostly from work in cell lines and mouse models From mouse based work it is now clear that dendritic cells represent a collection of specialized cell subsets that are particularly well endowed to stimulate antigen transport to distinct tissue locations to transfer antigens between cellular subsets or to trigger T cell responses Dendritic cell subsets hold great promise for therapeutic application for example as dendritic cell based vaccines to bolster immune responses against viruses or malignant growths Hurdles remain that preclude the efficient application of high quality pre clinical research into standardized patient care In this research topic efforts in dendritic cell research and dendritic cell based vaccines are discussed from both pre clinical and application points of view

Everyday Rituals Pearl Katz,2024-08-06 When we are in painfully difficult or confusing life situations especially amidst ever uncertain times our minds grapple for structure a funeral ceremony definitively lays the dead to rest the exaggerated choreography of a surgical room confirms its sterility and a daily schedule gives prisoners a sense of normalcy These practices these rituals give us peace Though it might seem contradictory ordered rituals actually bring us freedom creativity and mental well being Rituals aren't a thing of history or belonging to elaborate ceremonies and they aren't even confined to the most painful or confusing of times Rituals can be at a family dinner table or in a morning bathroom routine In *Everyday Rituals* Pearl Katz

shows us just how transformative rituals are no matter what kind Unlike other titles on the subject in the self help genre or in anthropological reportage Katz applies her years of fieldwork and psychiatric study to tangible everyday American life She writes a thoroughly persuasive argument using poignant case studies to truly inspire readers Specific hormones flow and brain paths open when artists follow their creative regimen and mental health increases in patients under hospital directive in contrast young people suffer stress in unbounded undergraduate hookup culture And after the coronavirus ripped many rituals from American life the ill effects of a life without routine burn bright It s in the ordinary that Katz discovers unlimited potential mundane routine actually sparks incredible imagination With scientific evidence case studies personal narrative and guiding wisdom Katz enlightens us as to how and why we can feel true freedom
