

Crosswalk

Highly visible crosswalk markings are combined with colored and textured asphalt.

Rain Garden

The landscape feature is planted with native plants and is used to filter pollutants from storm water runoff. Provides seating to accommodate street activities.

Bike Lane

Provides designated striping, signage, and colored paving. This portion of the street delineates the zone assigned to bicycles while visually and physically narrowing the vehicular zone.

Bike Parking

The dedicated and unobstructed bike parking zone helps keep bicycles off the sidewalk. Bollards are used to clearly delineate the space and provide protection from parking maneuvers. Additional bike racks may be provided at select street destinations.

Parallel Parking

This space effectively allows compression by physically narrowing the roadway and using decorative paving materials to visually expand the pedestrian realm.

Built-out

The sidewalk extension improves pedestrian crossings by reducing the pedestrian crossing distance and visually and physically narrowing the roadway. This built-out incorporates ADA compliant ramps and bollard protection.
