a general chemistry laboratory program The material focuses on the lab experiences that reinforce the concepts that not all

experimental conclusions are the same and depend on identifying an appropriate experimental procedure selecting the

proper apparatus employing the proper techniques systematically analyzing and interpreting the data and minimizing

inherent variables As a result of good data a scientific and analytical conclusion is made which may or may not be right but is

certainly consistent with the data Experiments write textbooks textbooks don t write experiments A student s scientific

literacy grows when experiences and observations associated with the scientific method are encountered Further

experimentation provides additional cause effect observations leading to an even better understanding of the experiment The

11th edition s experiments are informative and challenging while offering a solid foundation for technique safety and

experimental procedure The reporting and analysis of the data and the pre and post lab questions focus on the intuitiveness

of the experiment The experiments may accompany any general chemistry textbook and are compiled at the beginning of

each curricular unit An Additional Notes column is included in each experiment s Report Sheet to provide a space for

recording observations and data during the experiment Continued emphasis on handling data is supported by the Data
