Felice Varini Collectif:

The Ground from Which We Speak Fred Cummins, 2019-01-17 Joint speech includes chanting singing in unison swearing public oaths hollering at political rallies and the humble ritual of singing Happy Birthday It is found wherever people speak or sing the same words at the same time This familiar behavior is found in prayer and ritual in protest on the football terraces in classrooms and in many other situations of note These occasions are considered highly significant to those who take part and yet joint speech has not been addressed from a scientific or linguistic perspective until now This book provides a broad framing of how we might study joint speech It explores topics in linguistics movement science neuroscience and beyond but it does not assume the reader is at home in any of these Rather joint speech is familiar to us all and the discussion here leads to a broader consideration of how we understand our collective nature The topic provides an opportunity to address the difficulties and opportunities we encounter in considering collective subjects collective meaning making and collective identities Joint speech thus opens the door to a renewal of the human sciences in which we are not merely individuals but are grounded in collectives of many kinds

Drawing Music, Marking Time David Griffin, 2025-01-23 Marking down the complexities of musical pieces on paper allows them to become portable shareable and eminently teachable but how are the simple geometries of a music notation unfolded into space and time A music notation is an almost impossibly complicated bit of drawing Calling it a map or a diagram does not quite do the trick Its tracery supplies mechanisms for planning composition analysis annotation and performance of music But how is it that we read that simple strategic two dimensional geometry and make such complex four dimensional performances In this book David Griffin guides readers to a comprehensive understanding of the structural properties of music notations with a particular focus on the standard Western staff notation system looking at composers such as Bach John Cage Earle Brown and Stockhausen Developed over a thousand years ago the staff notation is a geometrical drawing method using dots and lines on a horizontal timeline for explaining the structure of a musical piece The system behaves a bit like a picture but it is also like a diagram and a bit like writing in its structure In the hands of an experienced user the notation s complex of marks and phatic elements allows us to leave behind the mere denotation of diagrams or pictures to become a connotative drawing system This book will attempt to de code music drawings untangling their strange knots of graphic and linguistic elements Using a series of visual examples Griffin presents background information on how the staff notation developed as an inter linguistic inscription a drawing that slips through the mere denotation of pictorial or diagrammatic graphics to become a connotative system with which we may craft subtle and powerful elements of musical poetry
