Cybersecurity and Resilience in the Arctic Kamrul Hossain,Igor Linkov,2020-07-15 Until recently the Arctic was almost impossible for anyone other than indigenous peoples and explorers to traverse Pervasive Arctic sea ice and harsh climatological conditions meant that the region was deemed incapable of supporting industrial activity or a Western lifestyle In the last decade however that longstanding reality has been dramatically and permanently altered Receding sea ice coupled with growing geopolitical disputes over Arctic resources territory and transportation channels has stimulated efforts to exploit newly open waterways to identify and extract desirable resources and to leverage industrial commercial and transportation opportunities emerging throughout the region This book presents papers from the NATO Advanced Research Workshop ARW Governance for Cyber Security and Resilience in the Arctic Held in Rovaniemi Finland from 27 30 January 2019 the workshop brought together top scholars in cybersecurity risk assessment governance and resilience to discuss potential analytical and governing strategies and offer perspectives on how to improve critical Arctic infrastructure against various human and natural threats The book is organized in three sections according to topical group and plenary discussions

at the meeting on cybersecurity infrastructure and threats analytical strategies for infrastructure threat absorption and resilience and legal frameworks and governance options to promote cyber resilience Summaries and detailed analysis are included within each section as summary chapters in the book The book provides a background on analytical tools relevant to risk and resilience analytics including risk assessment decision analysis supply chain management and resilience analytics It will allow government native and civil society groups military stakeholders and civilian practitioners to understand better on how to enhance the Arctic s resilience against various natural and anthropogenic challenges
