information-flow. Potential security risks Dominik Kropp, 2020-12-14 Master's Thesis from the year 2019 in the subject
Computer Science Software grade 77 City University London course Software Engineering language English abstract The
objectives of this project are to design implement and systematically demonstrate a chosen type system considering
reliability performance and scalability Furthermore it aims to determine the limitations of the implementation and alternative
architectural designs to evaluate the extent to which the developed prototype scales up to real life scenarios and to
investigate the feasibility of a similar security type system for SAP systems Standard security practices such as access
controls insufficiently assure secure end to end behaviour of an application Any program flaw no matter how small or big
poses a potential security risk Static information flow analysis checks a program for confidential information leaks into public
data containers at compile time This design and build project's aim is the prototypical implementation of a security type
system for a simple demonstrative language to prevent programs leaking confidential information effectively The project is
based on existing research concerning security type systems as a means of enforcing information flow policies in a program
The results are discussed not only in terms of validity but also considering the feasibility of a similar security type system for
SAP enterprise resource management systems Society relies heavily on software intensive systems in all facets of life
Information is automatically processed in automobiles phones fridges and countless web servers Much of that information is
personal data and can distinguish an individual's identity such as their name biometric records or email addresses
Intellectual property and confidential information are handled in mission critical military governmental medical and business
applications Therefore building trust in the handling of data by systems is a crucial aspect of software architecture design
