## **Guide To Biometrics Springer Professional Computing:**

Guide to Biometrics Ruud M. Bolle, Jonathan H. Connell, Sharath Pankanti, Nalini K. Ratha, Andrew W. Senior, 2013-06-29 Starting with fingerprints more than a hundred years ago there has been ongoing research in biometrics Within the last forty years face and speaker recognition have emerged as research topics However as recently as a decade ago biometrics itself did not exist as an independent field Each of the biometric related topics grew out of different disciplines For example the study of fingerprints came from forensics and pattern recognition speaker recognition evolved from signal processing the beginnings of face recognition were in computer vision and privacy concerns arose from the public policy arena One of the challenges of any new field is to state what the core ideas are that define the field in order to provide a research agenda for the field and identify key research problems Biometrics has been grappling with this challenge since the late 1990s With the maturation of biometrics the separate biometrics areas are coalescing into the new discipline of biometrics The establishment of biometrics as a recognized field of inquiry allows the research community to identify problems that are common to biometrics in general It is this identification of common problems that will define biometrics as a field and allow for broad advancement

**Fundamentals of Verbal and Nonverbal Communication and the Biometric Issue** Anna Esposito, NATO Programme for Security through Science, 2007 The main theme of this publication is the fundamental features of verbal and nonverbal communication and their relationships with the identification of a person his her socio cultural background and personal traits The problem of understanding human behaviour in terms of personal traits and the possibility of an algorithmic implementation that exploits personal traits to identify a person unambiguously are among the great challenges of modern science and technology On the one hand there is the theoretical question of what makes each individual unique among all others that share similar traits and what makes a culture unique among various cultures On the other hand there is the technological need to be able to protect people from individual disturbance and dangerous behaviour that could damage an entire community interesting research areas is that related to human interaction and face to face communication It is in this context that knowledge is shared and personal traits acquire their significance
