

SCIENTIFIC WRITING GUIDE

GENERAL GUIDELINES AND SCIENTIFIC WRITING CONVENTIONS

- All assignments must be typed and double spaced. Use a 12-point font with 1" margins.
- Remember that this is a formal writing assignment. Do not use slang or contractions.
- Write in 3rd person as this is how most scientific papers are written.
- Do not use direct quotes in your paper, instead paraphrase material and cite the source of the information. It is considered plagiarism if you copy the intent of the writer, even if you change around a few words, so be very careful to make sure all material represents your voice and thoughts, not those of the original author.
- Write out numbers less than 10, unless the number is a measurement.

TITLE PAGE

The title page should contain the following information:

- Title – The title should be informative. Your reader should be able to gain a basic understanding of what is contained in your paper by reading the title.
- Your name (if individual or all group members if group)
- Course number and section number
- Your instructor's name
- Due date

HYPOTHESIS AND PREDICTION

You will not write a formal introduction for your assignments in this class, but you should write a paragraph that includes the purpose of the experiment, the hypothesis, and the experimental productions.

METHODS

The methods section of the paper should be a concise summary of the methods you used to conduct the experiment. *If we change any of the procedures from the lab manual, include what we did, not what is written in the manual.* The methods section should summarize your experimental procedure. You do not need to
