## jMeter - Overview

Before going into the details of JMeter, let us first understand a few jargons associated with the testing of any application.

- **Performance Test** – This test sets the best possible performance expectation under a given configuration of infrastructure. It also highlights early in the testing process if any changes need to be made before the application goes into production.
- **Load Test** – This test is basically used for testing the system under the top load it was designed to operate under.
- **Stress Test** – This test is an attempt to break the system by overwhelming its resources.
