**Internet of Things and the Law** Guido Noto La Diega, 2022-10-14 Internet of Things and the Law Legal Strategies for Consumer Centric Smart Technologies is the most comprehensive and up to date analysis of the legal issues in the Internet of Things IoT For decades the decreasing importance of tangible wealth and power and the increasing significance of their disembodied counterparts has been the subject of much legal research For some time now legal scholars have grappled with how laws drafted for tangible property and predigital offline technologies can cope with dematerialisation digitalisation and the internet As dematerialisation continues this book aims to illuminate the opposite movement rematerialisation namely the return of data knowledge and power within a physical smart world This development frames the book s central question can the law steer rematerialisation in a human centric and socially just direction To answer it the book focuses on the IoT the sociotechnological phenomenon that is primarily responsible for this shift After a thorough analysis of how existing laws can be interpreted to empower IoT end users Noto La Diega leaves us with the fundamental question of what happens when the law fails us and concludes with a call for collective resistance against smart capitalism The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY 4.0 license

**Producing and Analyzing Macro-Connectomes: Current State and Challenges** Mihail Bota, Sharon Crook, Marcus Kaiser, 2016-10-20 Construction of comprehensive and detailed brain regions neuroanatomical connections matrices macro connectomes is necessary to understand how the nervous system is organized and to elucidate how its different parts interact Macro connectomes also are the structural foundation of any finer granularity approaches at the neuron classes and types meso connectomes or individual neuron micro connectomes levels The advent of novel neuroanatomical methods as well as combinations of classic techniques form the basis of several large scale projects with the ultimate goal of producing publicly available connectomes at different levels A parallel approach that of systematic and comprehensive collation of connectivity data from the published literature and from publicly accessible neuroinformatics platforms has produced macro connectomes of different parts of the central nervous system CNS in several mammalian species The emergence of these public platforms that allow for the manipulation of rich connectivity data sets and enable the construction of CNS macro connectomes in different species may have significant and long lasting implications Moreover when these efforts are leveraged by novel statistical methods they may influence our way of thinking about the brain Hence the present brain region centric paradigm may be challenged by a network centric one Ultimately these projects will provide the information and knowledge for understanding how different neuronal parts communicate and function developing novel approaches to diseases and disorders and facilitating translational efforts in neurosciences With this Research Topic we bring together the current state of macro connectome related projects including the large scale production of thousands of publicly available neuronatomical experiments databases with tens of thousands of connectivity records collated from the published literature and the newest

methods for displaying and analyzing this information This topic also includes a wide range of challenges and how they are addressed from platforms designed to integrate connectivity data across different sources species and CNS levels of organization to languages specifically designed to use these data in models at different scales of resolution to efforts of 3D reconstruction and data integration and to approaches for extraction and representation of this knowledge Finally we address the present state of different efforts of meso connectomes construction and of computational modeling in the context of the information provided by macro connectomes

Stream Ecology J. David Allan, María M. Castillo, Krista A. Capps, 2021-03-17

Stream Ecology Structure and Function of Running Waters is designed to serve as a textbook for advanced undergraduate and graduate students and as a reference source for specialists in stream ecology and related fields This Third Edition is thoroughly updated and expanded to incorporate significant advances in our understanding of environmental factors biological interactions and ecosystem processes and how these vary with hydrological geomorphological and landscape setting The broad diversity of running waters from torrential mountain brooks to large lowland rivers to great river systems whose basins occupy sub continents makes river ecosystems appear overwhelming complex A central theme of this book is that although the settings are often unique the processes at work in running waters are general and increasingly well understood Even as our scientific understanding of stream ecosystems rapidly advances the pressures arising from diverse human activities continue to threaten the health of rivers worldwide This book presents vital new findings concerning human impacts and the advances in pollution control flow management restoration and conservation planning that point to practical solutions Reviews of the first edition an unusually lucid and judicious reassessment of the state of stream ecology Science Magazine provides an excellent introduction to the area for advanced undergraduates and graduate students Limnology Oceanography a valuable reference for all those interested in the ecology of running waters Transactions of the American Fisheries Society Reviews of the second edition Overall a must for the field centre and a good starter text in stream ecology TEN News October 2007 Highly recommended Upper division undergraduates through faculty P R Pinet CHOICE Vol 45 7 2008 a very good fluidly readable book which contains the latest key scientific knowledge of the ecology of running waters Daniel Graeber International Review of Hydrobiology Vol 94 2 2009

**Ab initio Quantum Monte Carlo Tutorial** Ryo Maezono, 2026-02-23 This book offers a unique learn by tutorial approach for ab initio quantum Monte Carlo QMC electronic state calculations The ab initio QMC method is a representative Beyond DFT technique that overcomes challenges faced by the widely used density functional theory DFT in materials science This is the first book focusing on simulation operations of ab initio QMC methods in a tutorial format This book explains the theoretical background of the ab initio QMC method as a showcase of many body electron theory attracting interest also from fundamental scientists dealing with

quantum many body problems The content of this book is written in an accessible manner targeting the same audience as the author's previous work *Ab initio Calculation Tutorial For Materials Analysis Informatics and Design* It is structured to allow beginners in simulation from experimental fields and industry to set up practice codes on their personal PCs and learn independently without assuming prior knowledge of many body electron theory or simulation science Readers learn how to solve the problems on intermolecular binding forces in biomolecular systems magnetic descriptions in spintronics and material properties involving discontinuous density distributions such as surfaces interfaces and defects *Organic-matter Management and Tillage in Humid and Subhumid Africa*, 1990 **The Biology of Particles in Aquatic Systems, Second Edition** Roger S. Wotton, 2020-10-28 The Biology of Particles in Aquatic Systems Second Edition presents the latest information on particulate and dissolved matter found in aquatic habitats ranging from small streams to oceans Only by studying this matter can we gain an understanding of the functioning of aquatic ecosystems and thus be able to predict changes that may occur as these systems become stressed Updated and extensively revised this new edition covers such topics as classification of particulate and dissolved matter origin and formation of particles aquatic systems factors affecting particle aggregation methods for capturing particles by benthic and planktonic animals and the use of particulate and dissolved organic matter as food [Encyclopedia of Soil Science](#) Rattan Lal, 2017-01-11 New and Improved Global Edition Three Volume Set A ready reference addressing a multitude of soil and soil management concerns the highly anticipated and widely expanded third edition of Encyclopedia of Soil Science now spans three volumes and covers ground on a global scale A definitive guide designed for both coursework and self study this latest version describes every branch of soil science and delves into trans disciplinary issues that focus on inter connectivity or the nexus approach For Soil Scientists Crop Scientists Plant Scientists and More A host of contributors from around the world weigh in on underlying themes relevant to natural and agricultural ecosystems Factoring in a rapidly changing climate and a vastly growing population they sound off on topics that include soil degradation climate change soil carbon sequestration food and nutritional security hidden hunger water quality non point source pollution micronutrients and elemental transformations New in the Third Edition Contains over 600 entries Offers global geographical and thematic coverage Entries peer reviewed by subject experts Addresses current issues of global significance [Encyclopedia of Soil Science Third Edition Three Volume Set](#) expertly explains the science of soil and describes the material in terms that are easily accessible to researchers students academicians policy makers and laymen alike Also Available Online This Taylor E mail e reference taylorandfrancis.com International Tel 44 0 20 7017 6062 E mail online sales tandf.co.uk [Proceedings of the Third SHIFT-Workshop, Manaus, March 15-19, 1998](#) Reinhard Lieberei, Karsten Voss, Helmut Bianchi, 1998 [Proceedings of the Workshop on Biogeochemistry of Tropical Rain Forests--Problems for Research](#), 1987 [Fundamentals of Environmental Chemistry, Third Edition](#) Stanley E. **Water Research**, 1992 The Biogeochemistry of Manganese and Iron in the Pacific Ocean William Michael Landing, 1983 *Global Soil Biodiversity Atlas* European Commission. Joint Research Centre, 2016 The Atlas describes soil as habitat for the diversity of organisms that live under our feet At the same time it draws attention to the threats to soil biodiversity such as invasive species pollution intensive land use practices or climate change The Atlas provides current solutions for a sustainable management of soils It was coordinated by the JRC and the Global Soil Biodiversity Initiative [www.globalsoilbiodiversity.org](http://www.globalsoilbiodiversity.org) with more than 70 contributing organisations and several hundred individual contributions It illustrates the diversity of soil organisms explains their geographical and temporal distribution the ecosystem functions and services provided by soil biota Most importantly it draws attention to the myriad of threats to soil biodiversity These include inappropriate land management practices e.g deforestation land take for infrastructure development agricultural systems over grazing forest fires and poor water management both irrigation and drainage Other practices such as land conversion from grassland or forest to cropped land result in rapid loss of soil carbon which indirectly enhances global warming The Atlas shows that mismanaging soils could exacerbate the effects of climate change jeopardise agricultural production compromise the quality of ground water and worsen pollution It also proposes solutions to safeguard soil biodiversity through the development of policies that directly or indirectly target soil health leading to a more sustainable use
