

What Are Problem Solving Interview Questions?

These questions can take many different forms, but they all share a common goal: to evaluate an individual's problem-solving skills in a specific context.

Candidates are often encouraged to use the **STAR** (Situation, Task, Action, Result) approach to walk the interviewer through how they approach the problem to come to a solution.

A strong answer is assessed on how well they explain their approach, and not judged by the solution itself.

So it's about the journey, and not the destination. For example, did they walk, run, or fly? How well did they make use of the available resources?
