Communication, Digital Media, and Popular Culture in Korea Dal Yong Jin, Nojin Kwak, 2018-05-16 In recent decades Korean communication and media have substantially grown to become some of the most significant segments of Korean society. Since the early 1990s Korea has experienced several distinctive changes in its politics, economy, and technology which are directly related to the development of local media and culture. Korea has greatly developed several cutting edge technologies such as smartphones, video games, and mobile instant messengers to become the most networked society throughout the world. As the Korean Wave exemplifies, the once small and peripheral Korea has also created several unique local popular cultures including television programs, movies, and popular music known as K-pop, and these products have penetrated many parts of the world. As Korean media and popular culture have rapidly grown, the number of media scholars and topics covering these areas in academic discourses has increased. These scholars' interests have expanded from traditional media such as Korean journalism and cinema to several new cutting edge areas like digital technologies, health, communication, and LGBT related issues. In celebrating the Korean American Communication Association's fortieth anniversary in 2018, this book documents and historicizes the growth of growing scholarship in the realm of Korean media and communication.

Planning an Applied Research Project in Hospitality, Tourism, and Sports Frederic B. Mayo, 2013-10-22 Planning an Applied Research Project in Hospitality, Tourism, and Sports provides a comprehensive and carefully structured treatment of all the aspects involved in planning a research project. Instead of being a statistically oriented book, this text provides a conceptual and process oriented approach to planning and conducting research. Written for both students and professionals, it is easy to read, short, and to the point, i.e. practical. The book provides basic yet comprehensive information about doing research and can be used not only in a research methods course where students will have to plan and conduct a research project, but also in earlier course work to help students learn to write research papers. Planning an Applied Research Project in Hospitality, Tourism, and Sports covers a range of subjects including selecting a topic, conducting a literature review, developing a coherent design, and using various research techniques such as interviews, questionnaires, and observations. It also contains information on analyzing data once it has been collected and developing a proposal to obtain support before undertaking a research project. Unique coverage includes 2 chapters on conducting and writing a literature review, 1 chapter on analyzing data from both a qualitative and quantitative perspective, 1 chapter on writing a research proposal, and 3 detailed chapters on techniques.
