The Green Guide to Housing Specification Jane Anderson (B.A., MSc.), 2000 The Green Guide to Specification Jane Anderson, David Shiers, 2009-03-09 Like its predecessors this fourth edition of The Green Guide to

Specification provides designers and specifiers with easy to use guidance on how to make the best environmental choices when selecting construction materials and components. It is more comprehensive than its predecessors; it contains more than 1200 specifications used in six types of building: Commercial buildings such as offices, Educational buildings such as schools and universities, Healthcare buildings such as hospitals, Retail, Residential, Industrial. The principal building elements covered in this edition of The Green Guide to Specification include Floors, Roofs, Walls, Windows, Insulation, Landscaping. The performance of each specification is measured against a range of environmental impacts including climate change, toxicity, fossil fuel and ozone depletion levels of emissions and pollutants, mineral and water extraction. The Green Guide to Specification provides robust information to assist decision making by translating numerical life cycle assessment data into a simple A to E scale of environmental ratings, enabling specifiers to make meaningful comparisons between materials and components. The Green Guide to Specification is an essential tool for architects, surveyors, building managers and property owners seeking to reduce the environmental impact of their buildings by informed and responsible selection of construction materials and components.

Green Building Materials Ross Spiegel, Dru Meadows, 2010-11-09
GREEN BUILDING MATERIALS THE ULTIMATE USER'S MANUAL TO GREEN BUILDING MATERIALS To properly select and specify green building materials, successful architects need authoritative real world advice on how to select and use nontoxic, recycled and recyclable products and how to integrate these products into the design process in order to capitalize on the many practical and economic advantages of going green. Green Building Materials Third Edition is the most reliable up to date resource to meet today's green building challenges from reducing waste and improving energy efficiency to promoting proper code compliance and safeguarding against liability claims. Written by two nationally known experts on green building methods and materials, Green Building Materials Third Edition offers in depth practical information on the product selection, product specification and construction process. This new Third Edition is an excellent hands on guide to today's newest range of green building materials: what they are, where to find them, how to use them effectively and how to address LEED requirements. Organized by CSI MasterFormat category for fast access to specific information, it features a new chapter on eco labels, green standards and product certification, a new appendix providing reference information for sustainability standards and standards development organizations, new sample specifications including green power requirements, vegetated green roof systems, rainwater harvesting and water reuse systems, revised and updated review of trends affecting the future of green building materials, updated approach and reference information for the product selection process. Green Building Materials Third Edition is an essential tool for designing environmentally friendly buildings, ones made from materials that preserve the Earth's natural legacy for future generations.
