*Multiple Choice Questions in Hospital Pharmacy* Emad Hammouda, 2012-12-08 This book was issued in 2005 in response to the demands of competent pharmacists who are desperate to develop their career. It represents the experience of years of practice in hospital pharmacy in more than five middle east countries. The aim is to provide practical advice, exercise, and an assessment tool to improve the profession of hospital pharmacy. Because of the nature of the information, this book is intended at first to be distributed only to fellow hospital pharmacists, then if inspired by further acceptance, it may be handled and exploited by other healthcare professionals as well. The majority of the information is focused on real subjective situations encountered in every day practice. Every effort has been made to ensure that the information contained in this book is correct, but no liability can be accepted for any inaccuracies or mis-statements of fact contained herein, and any feedback is very welcomed. I hope that you will find this book useful and enjoyable as well. Emad I Hammouda RPh March 2005

*Multiple Choice Questions on Basic Medical Sciences* Urban John Arnold D'souza, 2018-11-18 Multiple Choice Questions on Basic Medical Sciences could help students to learn and get acquainted with the questions that are generally asked in multiple choice questions (MCQ) examinations in basic medical sciences subjects: anatomy, physiology, biochemistry, and pharmacology. The medical curriculum has moved away from the traditional system to an integrated holistic system over the years. Many medical schools have adopted integration in preclinical and clinical years, and students will be evaluated across their subjects as clinical and basic sciences knowledge amalgamates the holistic human body. Integration will allow the student to understand the intricate body systems comprehensively and homeostasis and pathological derangements in the human body. MCQ form of examinations is the complex type of evaluations where students find them as most tedious forms of evaluation. Unless a student has in-depth knowledge in the content of the subject, seldom do they answer the MCQ correctly. Students need to get good exposure and practice while preparing for MCQ examinations. There are very few reference books available on MCQ for students being in the transition period in preclinical years from fresh high school graduation. Basic sciences years of medical education need extra efforts to learn and understand. A form of guide or reference to learn the MCQ evaluation is a dire need for the students. This short book on MCQ will definitely help medical nursing and allied health sciences students as basic sciences are the foundation for future clinical years. Student's curiosity to learn medical subjects through multiple choice questions shall enhance their deep learning and reasoning as clinical conditions need a reference on normal body structure and functions. This book may provide a foundation in the initial years and a guide to build their basic sciences knowledge to a higher level.
