## Student Exploration: Laser Reflection

**Vocabulary:** angle of incidence, angle of reflection, laser, law of reflection, plane mirror, reflection

**Prior Knowledge Questions** (Do these BEFORE using the Gizmo.)

Imagine you shine a flashlight directly at a mirror, as shown below.

1. Draw an arrow showing the direction you think the beam of light will most likely reflect off the mirror.

2. Suppose you tilt the mirror. Draw an arrow showing the direction the beam will most likely reflect off the mirror now.

### Gizmo Warm-up

Flashlights produce wide beams of light that have various wavelengths. A **laser**, on the other hand, is a narrow beam of light with only one wavelength. All of the waves in a laser beam are parallel to one another. Because of this, lasers are ideal for studying reflection, or how waves bounce off a surface.

Using the Laser Reflection Gizmo™, you can adjust the position of a laser beam and mirror to study how light behaves when it is reflected.

1. Drag the **Angle** slider back and forth. Describe what happens to the reflected laser beam:

---

---

2. Drag the laser up and down. Describe what happens to the reflected laser beam: \_\_\_\_\_

---
