

# Evidence of Evolution

## Background

When Charles Darwin first proposed the idea that all new species descend from an ancestor, he performed an exhaustive amount of research to provide as much evidence as possible. Today, the major pieces of evidence for this theory can be broken down into the fossil record, embryology, comparative anatomy, and molecular biology.

## Fossils

This is a series of skulls and front leg fossils of organisms believed to be ancestors of the modern-day horse.
