

WEATHERIZATION

How does HWAP improve recipients' quality of life?

The program enables us to reduce energy costs for our clients. Through our work, the average savings per home is 18 to 20 percent, which is substantial for those living on a minimal income. We are also able to identify and eliminate dangerous health and safety issues in their homes, whether it is monitoring carbon monoxide levels or treating lead contamination. Weatherization improvements also increase the comfort of a home by maintaining the average temperature.

Lastly, we develop relationships with our clients. Whenever we can, we offer other resources that they can access to solve problems in their homes, beyond weatherization measures.
