Lessons in Organising Gawain Little, Ellie Sharp, Howard Stevenson, David Wilson,2023-03-20 A vital work on labour movement strategy by experienced union activists An excellent review of the attack on teachers and their unions by authors well placed to point to ways to improve the fight back and resistance Kevin Courtney Joint General Secretary NEU The heart of any trade union is its reps and activists organizing in the workplace After years of membership decline across sectors a renewed recognition of this essential fact is behind the turn to organizing in the union movement today This turn to collective organizing builds strength at a local as well as a national level and also aids in mobilizing around a wider range of political issues from campaigning against austerity to taking action for the environment In recent years this fusion of workplace organizing and national campaigning has been

exemplified by Europe's largest education trade union the National Education Union NEU In Lessons in Organising the authors bring together activist academic and union official perspectives to assess the potential and the limitations of the turn to organizing and set out the case for a new transformative trade unionism for the 21st century

Honour Based Crimes and the Law Mukaddes Gorar, 2021-05-10 Honour based violence and abuse manifests itself in different forms and this book offers a comprehensive understanding of this phenomenon This book argues that the limits of honour crimes must be defined more widely so that they include conducts and behaviours that originate from the patriarchal notion of honour such as honour based oppression and breast ironing The book provides a critical analysis and synthesis of the law in England and Wales and in the international human rights sphere The relevant domestic legislation and cases are examined to reflect on whether adequate protection is provided for the victims and potential victims of honour based violence and abuse Since honour based violence is a violation of human rights the relevant international human rights law is examined to illustrate the perception of such crimes in the international arena The effectiveness of any remedy for victims of honour based violence and abuse depends on its capability to change deep rooted behaviours in communities with honour based patriarchal values This book argues that the law does not provide the effective impact required in part due to patriarchal structures and that more efforts should be dedicated to changes in education It is held that there is a need for an educational programme that is especially designed to tackle violence and promote gender equality The book will be essential reading for academics researchers and policy makers working in the areas of Human Rights Law Criminal Law and Gender Studies

Engineering the Environment David P. D. Munns, 2017-07-19 Promising an end to global hunger and political instability huge climate controlled laboratories known as phytotrons spread around the world to thirty countries after the Second World War The United States built nearly a dozen including the first at Caltech in 1949 Made possible by computers and other novel greenhouse technologies of the early Cold War phytotrons enabled plant scientists to experiment on the environmental causes of growth and development of living organisms Subsequently they turned biologists into technologists who in their pursuit of knowledge about plants also set out to master the machines that controlled their environment Engineering the Environment tells the forgotten story of a research program that revealed the shape of the environment the limits of growth and development and the limits of human control over complex technological systems As support and funding for basic science dwindled in the mid 1960s phytotrons declined and ultimately disappeared until nearly thirty years later the British built the Ecotron to study the impact of climate change on biological communities By revisiting this history of phytotrons David Munns reminds us of the vital role they can play in helping researchers unravel the complexities of natural ecosystems in the Anthropocene

Invoking the Beyond: Paul D. Collins, Phillip D. Collins, 2020-11-22 The Gnostic revival of the Enlightenment witnessed the erection of what could be called the Kantian Rift an epistemological barrier between external reality and the mind of the percipient Arbitrarily proclaimed by German philosopher Immanuel Kant this barrier rendered the world as a terra incognita Suddenly the world out there was deemed imperceptible and unknowable In addition to the outer world the cherished metaphysical certainties of antiquity the soul a transcendent order and God swiftly evaporated The way was paved for a new set of modern mythmakers who would populate the world out there with their own surrogates for the Divine Collectively these surrogates could be referred to as the Beyond because they epistemologically and ontologically overwhelm humanity In recent years the Beyond has been invoked by theoreticians literary figures intelligence circles and deep state operatives who share some variant of a technocratic vision for the world In turn these mythmakers have either directly or indirectly served elitist interests that have been working toward the establishment of a global government and the creation of a New Man Their hegemony has been legitimized through the invocation of a wrathful earth goddess a technological Singularity a superweapon and extraterrestrial gods All of these are merely masks for the same counterfeit divinity the Beyond
