

Module 2: Phylogeny

- In module 1, you identified which species of lizards were most similar to one another based on relative limb length and toe pad size. In this module, you determined which lizards are more similar to one another based on what type of information?
I determined which lizards are more similar based on DNA sequence analysis.

- Are the species of lizard that are more similar to one another according to body type also more closely related based on the results obtained in this module? Explain your answer.

No, lizards that are similar according to body type are not more closely related based on the results obtained from the DNA sequence analysis. This is because similar body

- The figures below show two phylogenetic trees similar to the one you constructed in the virtual lab but with more lizards. The trees below show the evolutionary relationships among species from four ecomorphs from the four largest Caribbean islands.
