## **Local Development Performance Monitoring Report:**

Planning Across Borders in a Climate of Change Wendy Steele, Tooran Alizadeh, Leila Eslami-Andargoli, Silvia Serrao-Neumann, 2020-03-25 The fixity or mobility of borders are key themes within the border studies literature and have useful critical application to urban and environmental planning through theory pedagogy and practice This offers potential for transformative change through the processes of re bordering and re orienting established boundary demarcations in ways that support and promote sustainability in a climate of change Planning Across Borders in a Climate of Change draws on a range of diverse case studies from Australasia North and South America Europe Africa the Middle East and Asia and offers the application of border theory concepts and principles to planning as a critical lens It applies this lens to a range of international case studies in key areas such as climate change adaptation food security spatial planning critical infrastructure and urban ecology This collection fills an important gap in the border studies literature bringing climate change considerations to bear on planning It should be of interest to students scholars and professionals in the field of urban and environmental planning climate change adaptation border studies urban studies human and political geography environmental studies and development

**Resilient Cities** Konrad Otto-Zimmermann, 2011-05-16 Even with significant reductions of greenhouse gas emissions a certain degree of climate change will inevitably occur Adapting to climate change then will become a necessary step in reducing the vulnerability of many regions across the globe This is especially true for urban areas where climate change has been shown to have particularly destabilizing effects Through the identification and analysis of the most relevant impacts facing urban areas this book makes clear the need to incorporate climate change concerns into the mainstream of local planning governance and policy making practices Adaptation as a workable concept within urban areas cannot be treated in isolation from the many pre existing challenges facing cities By offering numerous examples of ongoing adaptation programs and strategies across a wide range of contexts the authors show the growing potential of cities in the fight against climate change This book has its origins in a collection of papers originally presented at the Resilient Cities 2010 Congress in Bonn Germany May 2010 the first global forum on cities and adaptation to climate change convened by ICLEI Local Governments for Sustainability In this volume the first in a new series dedicated to this annual event a range of contributors bring their perspectives to bear on the most pressing issues and controversies surrounding adaptation to climate change within cities These writings will prove invaluable to anyone interested in understanding and confronting climate change at the local level
