

LabVIEW™ Application Builder User Guide

Version 7.1

The LabVIEW Application Builder is an add-on package you can use to create stand-alone applications and shared libraries (DLLs) with LabVIEW. You can distribute these applications and shared libraries without the LabVIEW development system. Refer to the *National Instruments Software License Agreement* located on the LabVIEW Professional Development System and Application Builder distribution CDs for the licensing requirements for distributing applications and shared libraries.

This user guide contains instructions for installing the Application Builder, describes the system requirements for applications created with this version, and describes the changes introduced between previous versions and the current version. This user guide also describes caveats and recommendations to consider when you build a VI into an application or shared library.

You must use Application Builder 7.1 with LabVIEW 7.1.

For more information...

Refer to the *LabVIEW Help* for step-by-step instructions for building an application or shared library and for caveats to consider before building an application or shared library.
