2. It is assumed that you have some experience of soldering and building of simple kits and are confident to build the FET matcher. If not, there are many relevant tutorials and videos on the internet. Please spend some time familiarising yourself with construction and soldering techniques.

3. Note that U1 and the JFETs you will test are electrostatic sensitive devices and should be handled with care. If you have an ESD protective wristband, use that. If not, wear clothes made of natural materials (e.g. cotton), regularly touch your finger to an earthed (grounded) metal object (such as a central-heating radiator) and do not handle the sensitive devices any more than you have to. In particular, don't remove them from the electrostatic protective package until you are ready to fit them to the board.
