## LEARN EVOLUTION VIRTUAL LAB

### ANSWER THE FOLLOWING QUESTIONS AS YOU COMPLETE EACH PART OF THE VIRTUAL LAB

Answer the following questions as you complete each part of the virtual lab.

**Part 1: Introduction**

1. As you begin the virtual lab, you will see a population of 1000 birds with different wing shapes. What happens when you introduce a new predator? How does the population change over time?

Initially, the birds are evenly spread out. When the predator is introduced, they start to change. The birds with the most wings survive longer and have more offspring. Over time, the population shifts towards birds with more wings.

2. An adaptation is a trait that helps an organism survive in its environment. How does the virtual lab illustrate natural selection? Provide one example of an adaptation that is favored in this virtual world.

Example: Larger winged birds survive longer and have more offspring. This is an adaptation that is favored in this virtual world.

3. Explain how the birds' wing shapes change over time. What is the role of the predator in this process?

The predator catches birds with smaller wings, so birds with larger wings survive longer and have more offspring. This is an adaptation that is favored in this virtual world.

4. What is the role of the predator in the virtual lab?

The predator catches birds with smaller wings, so birds with larger wings survive longer and have more offspring. This is an adaptation that is favored in this virtual world.

5. How does the virtual lab illustrate natural selection?

Example: Larger winged birds survive longer and have more offspring. This is an adaptation that is favored in this virtual world.
