Color in Graphic Design Daniela Queiroz, Lucas Almeida, 2020-02-25 Color is an essential factor in design considering that it has a significant impact on the performance of the brand's communication marketing and sales. The color should not be chosen just because we like it or because we think it looks good since these are subjective values. There must be research on their meanings and associations, always remembering that they depend on cultural perceptions and that it is therefore important to know the audience we are working for. We often face the situation of not knowing which colors to choose for each of our designs due to the lack of knowledge about color theory and psychology. Unfortunately, the internet is full of inaccurate information. Still, in this e-book, we have addressed these topics correctly so the color selection process for each of your projects becomes an easy task.

Introduction to Design Alan Pipes, 2004 From the author of *Production for Graphic Designers 3e* this book provides an engaging introduction to the fundamentals of art and design. With a wide range of illustrations, Alan Pipes demonstrates in Part 1 Elements how an artist or designer fills a blank canvas nothingness with points, lines, shapes, textures, and colors in order to create a sense of space, time, and motion. Part 2 Rules reveals how to develop unity and harmony, balance, scale, and proportion, contrast, and emphasis, and rhythm, all in the quest for a satisfying illusion. In addition, the author demonstrates his formidable knowledge of computer-aided art and design, supplementing it with his own color or black and white diagrams. This book is ideal for students embarking on courses in graphic design, fine art, and illustration, as well as allied courses in interior design, fashion design, textile design, industrial design, product design, and printmaking
